

13,000 less than yesterday—and the final prices show no improvement over the last prices of yesterday. The continued sales of Central and Hudson, the usual manipulation of the two railroads, and the continuing decline of Chicago, were the chief features of the day's business. In what are called the active stocks, there were no movements which were not repetitions of those of other days before described. The market closed feverish and weak.

## RANGE OF THE STOCK MARKET.
